

DATA SHEET

The Ultimate Cloud Catalyst for IDEXX Cornerstone

You already rely on Cornerstone to run your veterinary clinic. Now transform it and unleash its potential. Vetanium from Evolve IP lets you experience your IDEXX Cornerstone PMS as a cloud-based service with zero maintenance, 100% data protection, and "any device, anywhere, anytime" accessibility.

A unique and powerful extension of your existing Practice Management Software (PMS)

IDEXX **Cornerstone*** Practice Management System

EVOLVE IP

THE CLOUD STRATEGY COMPANY™

VETANIUM

The Cloud Experience for Your Practice Management Software

What is Vetanium?

Vetanium is a unique Practice Management Software (PMS) Hosting Solution from Evolve IP. Vetanium unleashes the potential of your existing Cornerstone PMS by removing traditional constraints and extending functionality to the cloud. That means clients experience Cornerstone as a cloud-based service that's accessible on any device, anywhere, at any time. Vetanium empowers clients to:

- Handle more patients
- Provide better pet care and customer service
- Optimize your PMS experience

Maximize Practice Profitability

To provide efficient and effective care with fast, correct diagnosis, your a hospital needs its PMS technology to work. When your systems go down, you're left without the mission-critical tools you use every day to access your patients' information, communicate with clients, and provide your high-quality care. Vetanium has your needs covered by:

- Ensuring the highest level of system availability
- Maintaining all Digital Imaging and Communications (DICOM) integrations for X-rays and ultrasounds
- Supporting internal and external connectivity for reference labs, scanning, and printing
- Eliminating the need to manage software upgrades or purchase and maintain hardware
- Providing guaranteed data backup and recovery

Vetanium: Part of OneCloud Veterinary

Vetanium is an important component of Evolve IP's comprehensive OneCloud Veterinary services suite. OneCloud Veterinary ensures that your practice gets everything you need out of your investment in technology:

- **Protection:** Security for all your IT needs, protecting you from malware like viruses and adware, from cybercrime like hacking attacks and data theft, so your systems and important information are never at risk.
- **Disaster Recovery:** Business continuity and disaster recovery services that ensure your IT systems and data are backed up properly and that you're able to easily and quickly recover them even if your clinic is hit by disaster.

The Ultimate Cloud Catalyst for IDEXX-Cornerstone

- **Communication:** Business telephone solutions using VoIP cloud services that let you take advantage of an Enterprise-level phone system without the expense, and let you access your phones anywhere you need them.
- **Convenience:** Proven cloud computing solutions that let your clinic move important IT systems and data to a virtual computer environment that's faster, more easily scaled with the needs of your business, and accessible from any device you can connect to the internet.
- **Strategy:** IT consulting and chief information officer (CIO) services providing you the support of an expert team without the high costs of hiring your own in-house staff. We help you create a plan for using your technology to improve your clinic, year after year.

Our Only Agenda is Helping Vets Serve Pets

Ditch the Server

Go Green and Paperless. Aging hardware? No problem. By moving your data to the cloud, there's no need to worry about software upgrades or to spend additional money on IT maintenance costs. You will have the latest feature set rolled out to you seamlessly - to all of your users, all of the time.

Cyber Protection and Worry-Free Backups

- Antivirus, encryption, monitoring for suspicious activity and password protection/security
- Risk mitigation on lost or broken devices, on all applications and data (including PMS). This is all automated so there's nothing for you to address. 100% of the responsibility is off your plate!

Veterinary-Specific Help Desk and Managed Services

- With proactive monitoring, problems are addressed before you know it. Seamless upgrades and patch management - all coordinated with you and the practice management vendor.
- There's no need to worry about the software upgrades or to spend additional money on IT maintenance. You will have the latest feature set rolled out to all of your users, all the time, plus 24/7 access to a veterinary-specific help desk.
- Time is money. Spend time with clients, not in IT problems.

Cloud-Hosted PMS: Freedom to Work When, Where, and How You Want

- Imagine the ability to access your PMS from wherever you have an internet connection, from any device. A few use cases:
 - * Quick task while out sick
 - * After-hours access to client files
 - * Communication & collaboration during inclement weather
 - * Address a forgotten task while home or on-the-go
- Plus the data is in the cloud so it doesn't take storage space on your devices and you don't have to worry about losing the data (misplaced smartphone, coffee spill, malicious act, etc.).

Reach out to us today to see if Vetanium and OneCloud™ Veterinary is a fit for you.
